### DISCLAIMER

While all care has been taken in the preparation of this material, no responsibility is accepted by the author(s) or the Office for Recreation, Sport and Racing (ORSR), its staff, volunteers or partners, for any errors, omissions or inaccuracies. The material provided in this resource has been prepared to provide general information only. It is not intended to be relied upon or be a substitute for legal or other professional advice. No responsibility can be accepted by the author(s) or ORSR or its partners for any known or unknown consequences that may result from reliance on any information provided in this publication.
1. PURPOSE OF THIS GUIDE

Designed to supplement the South Australian Regional Level Recreation and Sport Facilities Planning Guidelines this resource has been developed to assist local government officers and others responsible for the planning, development and operation of recreation and sport facilities understand the principles in developing a Regional Recreation and Sport Plan.

2. BACKGROUND

Sport and recreation provides a stage to connect communities, contributes to economic growth, tourism, and improve health and well-being. As an integral part of the Australian way of life it is important that South Australia continues to provide quality recreation and sport facilities that encourage the community to participate.

Local Government is the major provider of recreation and sport facilities in South Australia. For the most part councils plan for and manage facilities on an individual council-by-council basis.

However, councils are facing a number of significant challenges including:

- **FACILITIES ARE AGEING** - and in need of major redevelopment or in some cases replacement to remain fit-for-purpose, affordable and sustainable to operate and maintain.

- **INEFFICIENT PROVISION AND DUPLICATION** – traditionally councils have focused on providing facilities within their respective council areas which has been a contributing factor to the duplication of facilities and services within regions.

- **INCREASING EXPECTATIONS** – there is increasing pressure on councils from sporting bodies and the general community to provide higher-standard facilities.

- **INCREASING PRESSURE ON OPEN SPACE** – there is increasing pressure on open space due to an ever increasing demand for housing supply close to population and activity centres.

- **INCREASING BUDGET PRESSURES** – it is becoming increasingly more competitive and difficult for councils to raise the capital required to deliver new quality infrastructure.

To create infrastructure of the future we need to look beyond municipal boundaries and find better ways to collaboratively plan, deliver and manage a strategic spread of recreation and sport facilities. One method of achieving this is through regional recreation and sport planning.

3. WHAT IS A REGIONAL PLAN?

A regional plan is an approach to planning which focuses attention on a designated region to identify and prioritise individual councils and the regions recreation and sport facility development needs now and into the future.
4. WHAT ARE THE BENEFITS OF PLANNING ON A REGIONAL LEVEL?

Using a regional approach to planning has a number of benefits for example:

- Provides councils with a standardised and shared set of facility data that provides a robust basis for future decision making at the local and regional level.
- Provides councils with an opportunity to benchmark the quality and performance of their recreation and sport facilities against other like facilities across the region.
- Provides councils with a process that identifies gaps in service provision and highlights opportunities for across council collaboration especially on major regional level projects.
- Provides councils with a medium to long term strategy that identifies and prioritises individual councils and the regions recreation and sporting facility development needs now and into the future.

5. CHARACTERISTICS OF AN EFFECTIVE REGIONAL RECREATION AND SPORTS PLAN

Effective plans generally have the following characteristics:

- Commitment from all partner councils (particularly at the elected member and senior leadership levels) to develop and implement the Plan.
- A clearly understood and agreed project scope which meets the needs of all partners.
- An agreed standardised set of data to be collected.
- An extensive and clearly articulated internal and external (community) engagement/communication plan.
- Use a co-design approach to the planning process through early and active involvement with those impacted (users, local community etc).
- Appreciate the community as the key partner “to bring life to facilities and ultimately ensure their success”.
- A clear understanding of the regions mix of recreation and sport facilities and associated assets. This includes consideration of state and privately owned facilities such as schools.
- An analysis of the demographic characteristics (profile) of current facility users, the local community and the identification of actual and potential population growth areas.
- A strategic assessment of current and future need including consideration of trends as drivers of changing needs.
- A gap analysis comparing the current provision of facilities with current and future need.
- Strategies for addressing gaps and priorities for short, medium and long term facility provision at the local and regional level.
- Identification of infrastructure priority projects for each council in the region.
- Identification of priority major regional level facility projects to be delivered in the region.
- Integration of priorities into other key Local Government strategic planning and financial documents.
- Allocation of a percentage of the project budget (e.g. 20%) to the implementation of a project/s that addresses an identified key regional issue.
- Identification of possible funding models and sources for the delivery and on-going management, maintenance of projects.
- An implementation plan with clearly identified responsibilities and timeframes.
- A partner endorsed process to progress, monitor and review the plan.
6. HOW TO DEVELOP A REGIONAL PLAN

Although the stages and process you follow to develop a regional plan will depend upon the needs and wants of the projects partners, to be effective they generally include the following steps:

<table>
<thead>
<tr>
<th>STEP</th>
<th>COMMENT</th>
</tr>
</thead>
</table>
| **STEP 1 – Commit to Action** | It is essential from the onset that there is a commitment from all partner councils, particularly at the elected member and senior leadership levels for the plan. One way this can be promoted is through the establishment of a Regional Planning Group *(for more information refer How to Establish a Regional Planning Group Guide)*.  
**Key outcomes to be achieved includes:**  
• Establish a Regional Planning Group. |

| **STEP 2 – Define the Scope & Context** | It is important that there is a clearly understood and agreed project scope which meets the needs of all project partners. This will help focus the project to ensure that it delivers what the partners want and set the parameters for the project brief.  
**Key questions that need to be addressed at this step include:**  
**What does the plan aim to deliver?** - what do the project partners want delivered as end products from the project?  
**What do you want the plan to cover?** - and what is out of scope?  
**Who should be consulted?** - at what stage of the project and how will they be engaged?  
**How will the community and other stakeholders be kept up-to-date on the progress of the project?** – development of a project communication plan.  
**What is the timescale of the plan?** How far into the future do you want the plan to focus on (3, 5, 10, 30 years?).  
**How much is to be allocated to the project?** - consider allocating a percentage of the project budget (e.g. 20%) to the implementation of a project/s that addresses an identified key regional issues.  
**Key outcomes to be achieved includes:**  
• Detailed project brief  
• Community Engagement Plan  
• Project Communication Plan.  
**TIP:**  
➢ Consider holding a councillor/executive officers ‘vision’ workshop to identify critical issues and deliverables that should be included in the scope.  
➢ The timescale of the Plan should align with the timescale of other relevant council plans and strategies and budget processes. |
**STEP 3 – Determine the Current State of Play (facility audit)**

<table>
<thead>
<tr>
<th>COMMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>It is important that there is a good understanding of the region’s current facility assets through an audit process.</td>
</tr>
<tr>
<td>Although the level and type of information to be collected from the audit will depend on the scope of the project the information to be collected should be standardised across each council and at the very least the audit should identify:</td>
</tr>
<tr>
<td><strong>Where the facilities are physically located?</strong> – To determine current facility provision and distribution. This includes determining:</td>
</tr>
<tr>
<td>• if the facility has good links to major road networks and connections to public transport, cycling and pedestrian routes, natural corridors and other community facilities or services.</td>
</tr>
<tr>
<td>• how the facility fits into the network and hierarchy of recreation and sport facilities provided in the council area and the broader region.</td>
</tr>
<tr>
<td>The data should be recorded both visually (on a map) and in written format.</td>
</tr>
<tr>
<td><strong>What clubs/community groups use the facilities?</strong> - Who leases/licences the site, what activities do they provide the community, how often do they provide it,</td>
</tr>
<tr>
<td><strong>What infrastructure is provided at the facility?</strong> – What currently exists at the facility (number of fields, does it have lights (lux level), what related facilities does it provide (e.g. clubhouse, number of male/female/disability change rooms/toilets, official/umpires change/toilet facilities)?</td>
</tr>
<tr>
<td><strong>What is the current state of the facilities and related infrastructure?</strong> – To determine facilities maintenance and future development needs. For example, when was the facility built? When was it last upgraded? Does the facility meet the required standards for the level of play? What is the current facility maintenance practices and needs?</td>
</tr>
<tr>
<td><strong>Who uses the facility (participant profile)?</strong> – To determine who uses the facility. Consider collecting participant data by age, gender, activity they participate in, residential postcode. Where possible consider getting data for the last 3-5 years to determine if there are any trends e.g. use is increasing or decreasing.</td>
</tr>
</tbody>
</table>
### 6. HOW TO DEVELOP A REGIONAL PLAN cont.

<table>
<thead>
<tr>
<th>STEP</th>
<th>COMMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>STEP 3</strong> – Determine the Current State of Play  (facility audit) &lt;br&gt;cont.</td>
<td><strong>Key outcomes to be achieved includes:</strong>&lt;br&gt;• Spatial Analysis of facilities in the region according to an agreed hierarchy (e.g. State, Regional, District, Local level facility).&lt;br&gt;• A standardised Facility Audit Report of existing recreation and sport facilities in the region (including school assets). Audit report to include detail on what is provided at the facility and assessment of the facilities functionality (is it fit-for-purpose?), and current and future upgrade/re-development needs.&lt;br&gt;• User Profile Analysis Report of the characteristics of participants who use each facility.&lt;br&gt;&lt;br&gt;<strong>TIPS:</strong>&lt;br&gt;➢ It is important to engage and consult with the user groups (clubs and users) throughout the audit process. Consider running a workshop or user surveys to determine things such as satisfaction with the facilities, requirements for additional facilities; Experiences – safety; security, accessibility etc.&lt;br&gt;➢ As part of the audit process consider conducting an energy review of the facility and set sustainability objectives and energy use targets for the next 3-5 year period. Ensure you have mechanism in place to measure and report against the performance of the facility.&lt;br&gt;➢ Consider the sites asset management and site maintenance requirements.&lt;br&gt;➢ When presenting maps and data for the region provide a conclusion for each map/data presented about what this means for the region moving forward.</td>
</tr>
</tbody>
</table>
### 6. HOW TO DEVELOP A REGIONAL PLAN  

**STEP 4 – Community Profile, Gap Analysis & Strategic Alignment**

Understanding the current and future demographics of a facility's local community as well as the region as a whole will assist you to identify how well a facility caters for the current and future needs of the local community as well helping to identify any gaps in facility and service provision.

**Things to consider include:**

- Undertake an analysis of the demographic characteristics of the local community and identification of actual and potential population growth areas.
- Determining the long term growth potential of the recreation and sport activities using facilities.
- Identification of gaps, duplication and/or oversupply of facilities.
- Identification of possible new sites for the development of new recreation and sport facilities.
- Undertake consultation with the local community and other key stakeholders including state recreation and sport organisations and relevant state government agencies to determine current and future trends, needs, demands, issues and especially opportunities.
- When presenting maps and data, always provide a conclusion for each map/data presented about what this means for the region moving forward.

**Key outcomes to be achieved includes:**

- Spatial mapping.
- Analysis of the current and potential future demographic characteristics (community profile) of the local community (by council and by region).
- Provide a comparative assessment of the regions supply and demand for facilities to identify gaps, duplication and/or oversupply of facilities.
- A review of state recreation and sport organisations facility strategies to identify facility development needs and explore opportunities for collaboration.
- A review of open space areas and existing facilities to determine potential locations for the development of new major regional level facilities.
### 6. HOW TO DEVELOP A REGIONAL PLAN cont.

<table>
<thead>
<tr>
<th>STEP</th>
<th>COMMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>STEP 5 – Strategies, Opportunities &amp; Priorities</strong></td>
<td>Once all of the data has been collected and analysed it needs to be synthesised into a final plan which identifies, justifies and prioritises projects to be delivered in the region over the designated period (e.g. 5-10 years).</td>
</tr>
</tbody>
</table>

**Key things to include:**

- Identification of infrastructure priority projects for each council in the region.
- Identification of priority regional level facility collaboration projects to be delivered in the region.
- Integration of priorities projects into other key Local Government strategic planning and financial documents.
- Align recommendations with state recreation and sport, state government and council directions and objectives.
- Identification of possible funding models and sources for the delivery and on-going management, maintenance of projects.
- An implementation plan with clearly identified responsibilities and timeframes.
- A partner endorsed mechanism to progress, monitor and review the plan.

**Key outcomes to be achieved includes:**

- Assessment methodology and criteria for prioritising projects.
- Regional Recreation and Sport Facilities Plan endorsed by all participating councils.
